RAPID TRANSIT.

The question of Rapid Transit in New York is one which cannot be allowed to suffer any delay in its settlement. Some delay there will be even yet, but it is a delay that can hardly be avoided. But the public voice should be so insistent in its demand for the prompt solution of this problem that it must come.

The only points to be considered are that Rapid Transit is a possibility and a necessity. Then the sooner its accomplishment is attempted the better. No other view has any reasonableness in it.

WISE INDIAN MEASURES.

Gen. SCHOPIELD has ordered Gen. MILES. by authority of the President, to appoint a Captain to a military supervision of the Pine Ridge Agency. Caution was enjoined against interfering unnecessarily in the administration of the agents of the Interior Department, while he was allowed certain latitude of military supervision.

The scandal of maitreating the Indians and hoodwinking the Government may be avoided if a strong, decisive policy of this kind is more generally pursued.

Secretary NonLE is said to have violently opposed the interference with the Department of the Interior by the anthy authorities. This is not to be wondered at, since such conduct is perfectly in consonance with the course the Secretary has pursued from the start. It is said that he will

So it is with cremation. It is a clean, neat, expeditious disposition of human remains which otherwise nature would disintegrate by a slow process, infinitely more revolting to the sensibilities were it appreciated. Let perfect freedom be accorded the in dividual in a matter of this kind.

PENSION SHARKS.

Isn't it time that a stop should be put to the persistent bleeding of old soldiers by the sharpers who work the pension business? More injustice has been brought to light. Pension claims which pension agents had atterly failed to secure were obtained through the efforts of Congressmen. Then the Pension Office calmly pocketed \$25 from the pension money of each claimant
